AMIN KHODDAM

Frontend Developer (React.js | Next.js)

Tehran, Iran | +98-910-459-0384 | amin.khoddam.connect@gmail.com | linkedin | portfolio | github

PROFESSIONAL SUMMARY

Frontend Developer with 3+ years of hands-on experience building production-ready web applications using React.js, Next.js, and TypeScript. Experienced in backend development with Node.js, Express.js, and MongoDB.

Focused on performance optimization, scalable application architecture, and maintainable code while following clean code and best practices to deliver reliable, high-quality user experiences.

TECHNICAL SKILLS

Frontend: React.js, Next.js, TypeScript, JavaScript (ES6+)
Backend: Node.js, Express.js, REST APIs
Databases & ODM: MongoDB (Mongoose)
State & Data: Zustand, Redux Toolkit, React Query (TanStack Query), Axios
Real-Time: WebSocket, Socket.IO
Forms & Validation: React Hook Form, Zod
UI & Styling: Tailwind CSS, shadcn/ui, Material UI, Responsive Design (Mobile-First)
Testing & Performance: Unit Testing, Vitest, Code Splitting, Lazy Loading, Core Web Vitals, Chrome DevTools
DevOps & Deployment: Docker, Docker Compose, CI/CD, GitHub Actions
Version Control & Tools: Git, GitHub, GitLab, Jira, Postman, Swagger, Figma

PROFESSIONAL EXPERIENCE

Frontend Developer | Pars Azmaye Teb | *Full-time | Tehran, Iran | May 2023 - Present*

- Improved Lighthouse Performance from 76 to 98 by resolving LCP and TBT issues.
- Reduced page transfer size from 2.8 MB to 1.9 MB through code splitting, image optimization, and API caching.
- Built an AI-powered chat interface for product discovery, simplifying how users find relevant products.
- Developed a reusable API layer with Axios, React Query, and custom hooks, reducing code duplication.
- Implemented a real-time ticketing chat system with WebSocket, supporting file attachments and notifications.
- Optimized SEO and page performance using Next.js App Router with SSR, SSG, and ISR.
- Collaborated with backend, QA, and design teams and participated in code reviews.

PROJECTS

Kavir Leather | Personal Project | *Backend Project*

- Built a secure authentication system using JWT access tokens and hashed refresh tokens, with token rotation, grace-window handling, and reuse detection to reduce the risk of token theft and replay attacks.
- Implemented reusable Express.js middleware for validation and auth, reducing code duplication.
- Developed Zod-based input validation and centralized error handling for consistent API responses.

My Portfolio

- Containerized the application with Docker and Docker Compose, enabling consistent deployments.
- Implemented CI/CD with GitHub Actions, enabling automated builds and deployments on every update.
- Deployed the application on a Linux VPS with Nginx, SSL, DNS, and Cloudflare for secure production use.

EDUCATION

Bachelor of Computer Science - Islamic Azad University of Tehran *(2024 - Present)*

LANGUAGES

Persian - Native **| English -** Intermediate (B1)
